AUTHOR INDEX FOR VOLUME 27. 464

INFORMATION FOR AUTHORS

The journal *Organizational Behavior and Human Performance* will publish papers describing original empirical research and theoretical developments in all areas of human performance theory and organizational psychology. Preference will be given to those articles which contribute to the development of principles or theories relevant to human performance or organizational behavior.

Manuscripts should be submitted to the Editor, James C. Naylor, Department of Psychological Sciences, Purdue University, West Lafayette, Indiana 47907. Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Organizational Behavior and Human Performance* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be prepared on high quality bond paper with wide margins using double spacing throughout. At least three copies should be submitted, each copy to include all figures and tables. Each page of the manuscript should be numbered. The first page should contain the article title, author's name and affiliation. At the bottom of this page list the name and complete mailing address of the person to whom proofs are to be sent. The second page should contain an abstract.

Authors are requested to follow the instructions given by the *Publication Manual* of the American Psychological Association. Certain modifications are listed below.

Equations. Equations should be numbered consecutively with the number placed in parentheses to the right of the equation. Limit numbering only to those equations that are in the main stream of the mathematical development. Refer to equations as Eq. (3) or simply (3), except at the beginning of a sentence when the word Equation should be spelled out. Equations should be punctuated to conform to their place in the syntax of the sentence.

Abbreviations and Symbols. Please do not use the abbreviations *S*, *E*, and *O* for subject, experimenter, and observer. Also do not underline symbols in text or formula, for they will be routinely set in italics. Unusual symbols should be identified in pencil in the margin the first time they appear.

Figures and Tables. All illustrations are to be considered as figures, and each graph or drawing should be numbered in sequence with Arabic numerals. Each figure should have a descriptive legend and these should be listed on a separate sheet. Figures should be planned to fit the proportion of the printed page (4½ × 6¾ inches), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50 to 60 percent. All figures must be original drawings or glossy prints.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table. Footnotes to tables should be identified by superscript letters and placed at the bottom of the page containing the table. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

References. Literature references in the text should be cited by author's surname and the year of publication, e.g., Roe (1960); Roe *et al.* (1961); Roe and Jones (1963, p. 150) (for references to a specific page). If a reference has more than two authors, the citation includes the surnames of all authors at the first mention, but later citations of the same reference include only the surname of the first author and the abbreviation "*et al.*" Suffixes *a, b,* etc., should be used following the date to distinguish two or more works by the same author(s) in the same year, e.g., (Roe, 1960a, 1960b). Literature citations in the bibliography should be arranged alphabetically according to the surname of the author. Journal titles should be written out in full rather than abbreviated. Please note style of capitalization and punctuation for journal articles, books, and edited books in the following examples:

Auerbach, C. Improvement of frequency discrimination with practice: an attentional model. *Organizational Behavior and Human Performance,* 1971, 6, 316–335.

Cautela, J. R., & Wisocki, R. A. The use of male and female therapists in the treatment of homosexual behavior. *In* R. D. Rubin & C. M. Franks (Eds.), *Advances in behavior therapy.* New York: Academic Press, 1970.

Tucker, I. *The psychology of adjustment.* New York: Academic Press, 1970.

Proofs and Reprints. Galley proofs will be sent to the author with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of composition. Fifty reprints of each article will be provided free of charge.

A Theory of Behavior in Organizations

By JAMES C. NAYLOR, ROBERT D. PRITCHARD, and DANIEL R. ILGEN

This volume creates a general theoretical schema for understanding the behavior of individuals in organizations. The authors integrate the psychological processes of perception, judgement, information integration, motivation, and individual differences, into a sequential view of human behavior while also proposing numerous new concepts. Special attention is given to the complex cognitive processes involved in rational behavior and the role of these processes in such traditional industrial/organizational areas as leadership, job satisfaction, role theory, and organizational climate. Emphasis is placed upon a theory of individual behavior applicable in a specific organizational context. The theory identifies and focuses on a sequence of critical cognitive process stages that form the basis for rational behavior. These stages are examined in detail and are integrated into a larger view for dealing with behavior in organizations.

SECTION HEADINGS: A Viewpoint Concerning Organizational Behavior. The Theory. Judgement. The Role of Judgement Within the Theory. Roles and Role Behaviors. Motivation. Leadership: A Major Factor of the Social Environment. Organizational Climate. Some Concluding Comments. References. Glossary. Index.

1980, 320 pp., $24.00 ISBN: 0-12-514450-4

Appetite

The Journal for Research on Intake, its Control and its Consequences

Chief Editors: Judith Rodin, Gordon Mogenson and David Booth

Publication: Quarterly

Subscription: Volume 2, 1981
£27.50 (UK) £34.40 (overseas)
$81.00 (overseas)

Appetite is the new interdisciplinary journal dedicated to research on intake in all its aspects:

fundamental – neural, systemic physiological, biochemical, pharmacological
– sensory, psychological, ecological
– social, cultural and economic
clinical – dietary, health risks, weight control, obesity, anorexia nervosa, malnutrition
industrial – sensory evaluation, consumer research on foods and drinks, petfoods, feed regulation in animal production
zoological – conservation, pest control, applied ecology of diet and foraging

The journal publishes reviews, mini-reviews, comments, reports of new investigations, abstracts, bibliographies, meeting reports, summaries of publications elsewhere and announcements. This major publication, while not affiliated to any society, is intended for researchers in a wide range of disciplines including psychology, anthropology, zoology, pharmacology, psychiatry, medical research, nutrition, food science and applied social science.

Organizational and Occupational Psychology No. 1

Managerial Communication

Concepts, Approaches and Techniques
edited by Theodore D. Weinshall
1979, xiv + 460pp., £15.00 (UK only) / $34.50, 0.12.741980.2

This book describes the various approaches to the study and description of managerial communication, and then discusses the different aspects of that research; for example, the reciprocity of communication, its feedback, auto-observation and cross-cultural aspects. The use of the Communicogram, a research tool developed by the author in 1959, is discussed in relation to these factors. The potential help of the Communicogram, in maintaining the necessary balance between what the organization is doing and the way it is run by management, presents a significant new advance in this field.

A.S.A. Monograph No. 19

Social Anthropology of Work

edited by Sandra Wallman
Hardback: 1979, xiv + 392pp., £14.00 (UK only) / $32.50, 0.12.733250.2
Paperback: 1979, xiv + 392pp., £6.80 (UK only) / $16.00, 0.12.733252.9

This book places work in the context of social relationships and symbolic values, exposing the systematic connections between the many elements that make up the organization and experience of work in a variety of social structures. Drawing these elements together in an introductory chapter, the editor indicates where they occur and how they relate within the book, while the subsequent papers present self-contained case-studies and theoretical considerations.
